## PROFESSIONAL SUMMARY :

---

Experienced **Full Stack Developer** with 2+ years of expertise in **front-end and back-end development**, specializing in building responsive, user-friendly web applications. Proficient in **HTML, CSS, JavaScript, React, PHP, and MySQL**, with hands-on experience in **RESTful API development**, database management, and system integration. Skilled in **bug fixing**, performance optimization, and customizing solutions to meet client needs. Passionate about delivering high-quality code and innovative solutions to drive business success. Seeking a challenging role to contribute technical expertise and creativity effectively.

## QUALIFICATION :

---

**Bachelor of Computer Application** from Bilaspur University, Chhattisgarh Passed in 2022 with **73.5%**.

**Higher Secondary School** from Chhattisgarh Board of Secondary Education Passed in 2018 with **71.62%**.

**High School Certificate** from Chhattisgarh Board of Secondary Education Passed in 2016 with **82.16%**.

## WORK EXPERIENCE:

---

### Deepija Telecom Pvt. Ltd.

#### Software Engineer

Hyderabad TS

Dec 2022 - Present

- **Bug Fixing and Product Customization:**
  - Identified and resolved bugs in the company's product, **ConVoxCCS**, ensuring optimal performance and user satisfaction.
  - Customized the product to meet specific client requirements, enhancing functionality and user experience.
- **Development and Integrations:**
  - Integrated third-party APIs for SMS, email, and Red App-like dialers, expanding product capabilities.
  - Designed and developed **15+ APIs** for ConVoxCCS, introducing new features and improving overall functionality.
  - Optimized existing codebase to enhance product speed, reliability, and scalability.
  - Performed **database migration** and wrote numerous scripts for database maintenance, ensuring data integrity and system efficiency.
  - Designed and implemented an **API Adapter web application** using **JavaScript** for interactive front-end features and **PHP** for server-side logic, improving API integration for **50+ clients**.
  - Developed an **API Gateway feature** with a **JavaScript-based front-end** for clients to test APIs and **PHP** for back-end processing, reducing API-related errors by **25%**.
- **System Performance Monitoring:**
  - Created custom **JavaScript** scripts to monitor system performance and automate issue resolution, reducing system downtime by **20%**.
- **Technologies Used:**

HTML, CSS, JavaScript, Bootstrap, jQuery, AJAX, RESTful APIs, PHP, Perl, MySQL, Crontab, GitLab.

## PROJECTS :

---

### Movie Recommendation System (Netflix GPT)

[GitHub-Link](#)

- Developed a **user-responsive web application** for movie recommendations, inspired by Netflix, with a **global search bar** powered by **Gemini** for text generation and movie searches.
- Implemented **user authentication** using **Firebase**, ensuring secure access to the platform.
- Integrated **TMDB API** for fetching movie data and **Gemini API** for generating dynamic text content.
- Utilized **Redux-Toolkit** for efficient state management and **React-Router-Dom** for dynamic routing, enhancing user navigation.
- Followed **best coding practices**, including **custom hooks** and **React Memorization**, to optimize performance and maintainability.
- Designed a **responsive UI** using **Tailwind CSS**, ensuring seamless user experience across devices.

### E-Commerce Application - Shop karo (working)

[GitHub-Link](#)

- Developed a **full-stack e-commerce application**, **Shop Karo**, designed to deliver a seamless and secure online shopping experience.
- Implemented **JWT token-based user authentication** to ensure secure user interactions and data protection.
- Built a **user-friendly interface** using **React** and styled it with **Bootstrap** for a responsive and visually appealing design.
- Managed application state efficiently using **Redux-Toolkit**, handling product data, cart details, and user sessions seamlessly.
- Designed and developed **backend APIs** using **Node.js** and **Express** for secure and efficient data handling.
- Utilized **MongoDB** as the database to store product details, user information, and order history, ensuring scalability and reliability.

## TECHNICAL SKILLS:

---

- **Frontend Technologies:** HTML, CSS, JavaScript, Bootstrap, Tailwind CSS, React, Redux-Toolkit, React-Router.
- **Backend Technologies:** PHP, Node.js, RESTful APIs.
- **Databases:** MySQL, MongoDB.
- **Servers:** Linux, Ubuntu.
- **Version Control:** Git, GitHub, GitLab.
- **Tools & IDEs:** Visual Studio Code, Vim, Postman, MobaXterm.

## CERTIFICATION:

---

- **Namaste React** Jun 2024 – Oct 2024  
*By Akshay Saini Online*
- **Complete web Development (MERN)** Nov 2024 – Feb 2025  
*From Udemy Online*

## LANGUAGES :

---

- English (Full professional proficiency)
- Hindi (Professional working proficiency)
